06
future plan

Our vision is to develop an interesting and fun game with GameFi and social elements, with online services (member services in the AI field, games, online shopping, flight bookings, hotel bookings, etc.) as the core business. By combining business with blockchain technology, we will provide a convenient and cost-effective payment service to all shareholders who choose PIG tokens.

In the early stages, we leveraged the key features of contemporary DeFi platforms to create a game centered around a simple sliding mechanism to provide a fair mining opportunity for our community's shareholders.

P

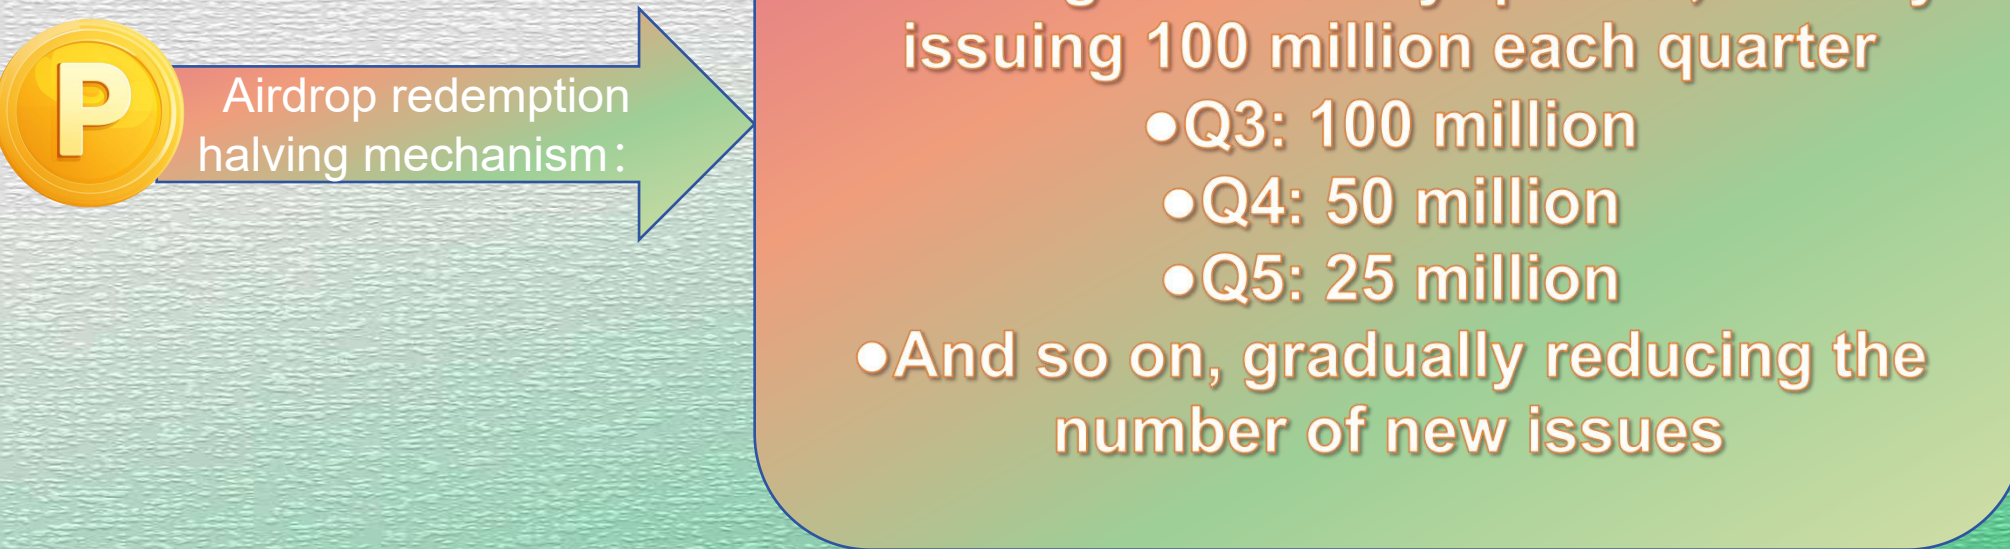

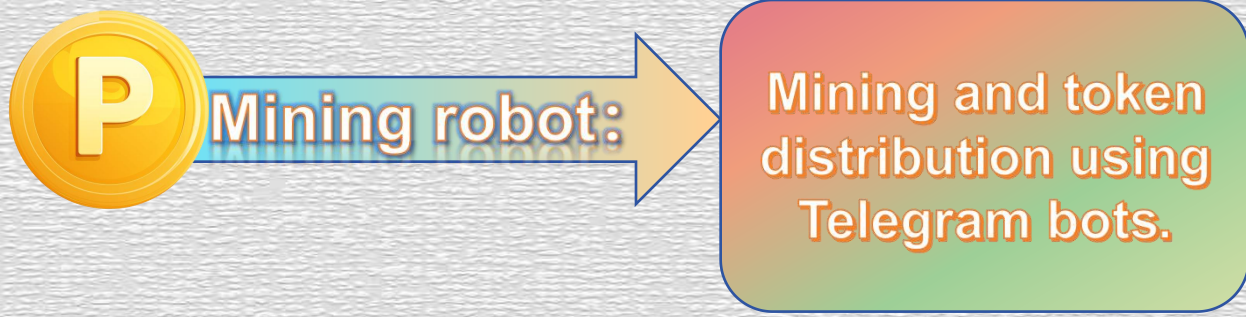

Game overview

PIGCoin is a fun, simple and fun sliding game where you can get shares (catcions) by sliding the screen.

Top ranked players (top 100,000) have the opportunity to receive PIGCoin tokens and NFT airdrops from our community.

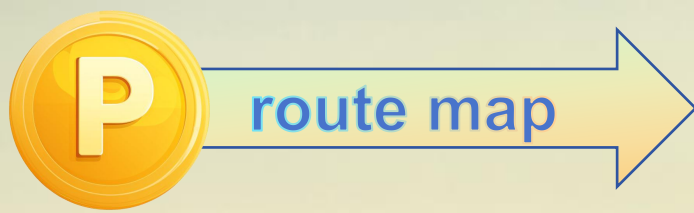

Airdrops:

Early players have the opportunity to receive PIG tokens and NFT airdrops from the PIG community.

Other features:

Liquidity pools, margin trading, etc.

Launch PIGCoinGame Q2-Q3 2024

Launch and develop Telegram PIG themed casual game community, using the "swipe to earn" model to attract our first users.

Timeline infographic

Airdrop, Exchange Listing, Staking

Q4 2024

List project tokens on leading cryptocurrency exchanges, initiate token airdrops, and reward early users and community contributors. Enable token staking functions with an estimated annual return rate of 50%-100%, subject to the actual number of participants.

PIGCoin Travel Revolution

Q2 2025

With joint efforts with major players in the travel, gaming, online shopping, AI, and industry sectors, we are promoting a breakthrough business model that uses PIG coins to replace traditional currency payments. This initiative aims to completely change the payment landscape in the travel, online shopping, gaming, and AI industries and provide a seamless, efficient, and secure transaction experience. By leveraging the advantages of digital currency, we expect PIG Coin to set new standards for travel, gaming, online shopping, and AI transactions, enhancing convenience. Effective for both businesses and customers.

Open NFT studio and airdrop

Q1 2025

Introducing our official DIY Original Game Room NFT, accompanied by an exclusive airdrop for early users. This initiative offers a pioneering experience within our meticulously designed game space.

PIG Payment Launch

Q3-Q4 2025

The official launch of PIG's new payment system has been announced.

Token Economics

There will only ever be 5 billion PIG tokens in existence and the mining output will be halved every quarter. After PIGCoin is listed, the community's advertising fees and other commercial income will all be used to repurchase tokens and destroy them, ensuring that the coin price rises.

61% AIRDROP

For the stability of the currency, PIGCoin will not airdrop all the tokens at once, but will give priority to airdropping a portion of the tokens to the top 100,000 coin holders. PIGCoin will not airdrop all the rewards, and ecosystem maintenance, adhering strictly to the principle of fairness. In order to ensure the price stability of the currency, PIGCoin will not airdrop all the tokens at once, but will give priority to airdropping a portion of the tokens to the top 100,000 coin holders.

32% STAKING REWARDS

32% is used for staking rewards.

5% LIQUIDITY

In Q1, PIGCoin liquidity will be increased through the introduction of staking opportunities and the availability of accelerator shares for purchase. These measures are part of our strategic plan to enhance PIGCoin's liquidity and strengthen its position within the market.

2% ECOSYSTEM

2% is used for ecosystem maintenance to ensure the normal operation of the ecosystem.
